New!

New seforim: Roughly 5000 new seforim have been added to the repository, including some very practical books such as the 25-volume extended **Oz VeHadar Shas**, the 24-vol. **Tzitz Eliezer**, the 24-vol. **Nitei Gavriel**, the 9-vol. **Pischei Choshen**, the 27-vol. **Yalkut Yosef**, the 15-vol. **Mishnas Yosef**, and the 5-vol. **Taba'as HaChoshen**.

Finally!

Turning scanned files to text: highlighting the requested section on the scanned page and then clicking on a key converts it into text using OCR technology. In order to improve the deciphering quality, a user-friendly editing option is available that compares the text to the scanned picture.

New Development!

Titles: previews of page titles and book pages on the main screen are moved by the scroll bar and enable a quick "glance" at the book content without having to open the book.

Efficiency!

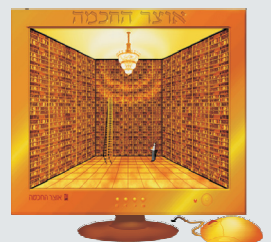

Free search: 1. We have extended the free search-by-word option and it now includes about 20,000 seforim (instead of 15,000).

2. Upgraded usage of the search option: users can now scroll through the search options while simultaneously viewing immediate results on the main screen without having to open the book.

Otzar HaHochma
Contains all of the essential seforim,
Thousands of recently published and most other useful
contemporary Jewish books, as well as ancient and rare
books, original manuscripts, and more.

Otzar HaHochma
