Otzar hachochma is an external hard drive the size of an iPhone. It contains approximately 15,000,000 pages scanned in their original format from 59,000 *Seforim*.

2

Otzar Hachochma costs as much as a *streimel*, but the total value of all the seforim contained in it is equivalent to the cost of a 5 bedroom apartment in Jerusalem.

3

Otzar Hachochma contains a **free search option** yielding results from all of our books. The search option (of any words) is simply the best and most effective way to access all of the books in the program.

4

Using the Otzar hachochma's search engine, 99% of the Jewish population can find mention of their relatives, their communities, and their roots.

5

It is possible to add separate packages of the seforim from Machon Yerushalayim, Ahavat Shalom and Mossad Harav Kook. They are marketing their seforim as a whole in Otzar Hachochma software.

6

The founders, programmers, developers, and support staff are bnei Torah, who understand the needs of the clientele and have created the software based on those needs.

7

Otzar Hachochma is extremely user friendly so even though many of the clients are not computer literate, they have no trouble using the program.

8
